**CHROMCRAFT FURNITURE INTRODUCES NEW CASUAL DINING CONCEPTS IN MIXED MEDIA**

**SENATOBIA, MS, March 2007** – Chromcraft Home Furnishings, one of the industry's most resourceful and innovative furniture companies and one of a family of furniture brands developed and marketed by CR-Home, the corporate brand of Chromcraft Revington, Inc., will introduce three mixed media groups and two wood groups at market. The wood groups include one painted group with wood tone top, and one group with a deep wood finish and leather seat accents.

**Zulu by Chromcraft**

As its name suggests, Zulu by Chromcraft is simple in shape, yet global in style influence. The graceful, elementally shaped black wrought iron collection features leather-like seats, see-through glass top tables and tapered chair backs with a distinctive acid-etched inset panel which adds a golden and black accent. The African-inspired contemporary dining group is promotionally priced and comes with a 45" round beveled edge glass table top.

**Gibraltar by Chromcraft**

Offered in 40 x 60 rectangular dining and a 42 square (36H) high dining, Gibraltar by Chromcraft is as substantial in look and finish as its name implies. The group features a weathered bronze metal finish and window pane styled metal chairs with high endurance, stain resistant microfiber seats. Its table tops are further distinguished with medium oak and marble glass inlays for a contemporary look that is engagingly casual with mixed media styling appeal.

**Eclipse by Chromcraft**

Chromcraft's new Eclipse group expands on the most popular elements of the Chromcraft Florenza group, featuring a lightly brushed, distressed copper finish, round metal tops with acid-etched interlocking organic swirl design and matching insets in cross-braced chairs accented with taupe microfiber seats and backs. Eclipse is popularly priced to sell at \$599 including table and four chairs.

**Somerset Cottage by Chromcraft**

With a slightly distressed cottage white rubbed-through finish, v-grooved wood finish top, shaped apron, tapered legs, open flared chair back and matching upholstered chair seat, Somerset Cottage by Chromcraft combines the most appealing details of casual dining into the quintessential answer to American cottage country styling. Table top will be shown in a wood tone finish. The five piece group includes table with leaf, four chairs, and comes in choice of 40" x 60" x 78 rectangle or 36 x 54 x 54 (36H) high dining.

**Ensenada by Chromcraft**

Reflecting a more rustic look with masculine appeal and casual feel, Ensenada by Chromcraft provides a transitional look that fits in well with anyone's style. The collection comes in a heavily distressed warm to dark finish of oak that gives it a tonal quality, and features cabriole legs with flared, rollback chair styling and sueded, microfiber upholstered chair seats and backs.
